

AMAN SETH

Full-Stack Python Developer

☎ +91-7977262315 ✉ amansethatwork@gmail.com 🔗 [linkedin.com/in/amansethhh](https://www.linkedin.com/in/amansethhh) 🐙 github.com/amansethhh

Summary

Full-Stack Python Developer with 2 deployed web applications built using React.js, Node.js, Django, and Python, tested by 15+ users. Achieved 91% ML classification accuracy on a 10,000+ review dataset using NLP, RoBERTa, and transformer-based models. Completed a Data Science & Analytics Internship at Imarticus Learning, building 4 Power BI dashboards for flight analytics using Python, SQL, Pandas, NumPy, Matplotlib, and Seaborn. Currently pursuing B.E. in Information Technology with an 8.16 CGPA.

Skills

Programming Languages: Python, JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Django, Django REST Framework (DRF), FastAPI, Node.js, Express.js, REST API Development

Databases: PostgreSQL, SQL

Tools & Technologies: Git, GitHub, Docker, Linux (CLI), Nginx

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), JWT Authentication, API Integration

Experience

Data Science & Analytics Intern

Feb 2026 – May 2026

Imarticus Learning Pvt. Ltd.

Thane, Maharashtra, India

- Analyzed flight datasets (10,000+ rows) using Python, SQL, Pandas, and NumPy to identify pricing patterns, delay trends, and operational insights across 5+ airline routes.
- Constructed 4 interactive Power BI dashboards and data visualizations using Matplotlib and Seaborn for airline pricing, route performance, and delay analysis, improving data accessibility by 10%.
- Wrote 20+ SQL queries for data extraction, filtering, joins, aggregation, and relational database analysis while performing data cleaning, preprocessing, transformation, and exploratory data analysis (EDA).
- Collaborated with a 3-member team to deliver end-to-end data analysis, visualization, and business insights presentations using Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Excel, and Power BI.

Projects

Orato AI | *React, Node.js, Express.js, Gemini API* | [GitHub](#) | [Live](#)

Nov 2025 – Jan 2026

- Developed and deployed a full-stack AI-powered web application for real-time speaking practice, tested by 15+ users with zero persistent data storage.
- Implemented real-time voice analysis using Web Speech API (speech-to-text) and MediaRecorder API, evaluating 4 speaking parameters (clarity, confidence, fluency, structure).
- Integrated Google Gemini API to generate structured feedback, scoring, and improved sample answers for 3 practice modes (interview, presentation, casual speaking).
- Engineered Node.js/Express.js backend with in-memory caching, rate limiting, request validation, and retry logic for resilient AI API handling.

ReviewSense Analytics | *Python, NLP, FastAPI, React.js* | [GitHub](#)

Feb 2026 – Mar 2026

- Designed and deployed a sentiment analysis system classifying 10,000+ reviews into 3 categories with 91% accuracy using transformer-based models (RoBERTa + XLM-R).
- Built NLP pipeline using multilingual preprocessing, Hinglish normalization, and transformer inference, reducing manual review effort by 60% through automated bulk processing.
- Created an interactive React-based dashboard with 5 visualizations for sentiment distribution, language analysis, word insights, and model performance metrics.
- Enabled multilingual text processing supporting 50+ languages with automated language detection, translation validation, and entropy-based confidence calibration with margin-based decision logic for reliable predictions.

Certifications

- **Introduction to Python – Infosys Springboard (2025):** Python programming covering core concepts, data types, control structures, and application development.

Education

Bachelor of Engineering (B.E.) in Information Technology

Pravin Rohidas Patil College of Engineering and Technology, Mumbai

Expected: 2027

CGPA: 8.16 / 10
